

After January 31, 2017, the ETF will no longer issue new Advisor Class Units. On or about April 28, 2017, the Manager intends to convert all Advisor Class Units into Class E Units. The following is only a summary of the principal features of this ETF. You can find more detailed information about the ETF in the prospectus. The prospectus is available on AlphaPro Management Inc.'s website at [www.horizonsetfs.com](http://www.horizonsetfs.com), or by contacting AlphaPro Management Inc. at [info@horizonsetfs.com](mailto:info@horizonsetfs.com), or by calling 416-933-5745.

\* Positions in forward contracts are disclosed as the gain/(loss) that would be realized if the contracts were closed out on the date of this report.

### Key Investment Strategies

The ETF invests primarily in exchange traded products and futures contracts to gain exposure to the performance of broad markets or sector markets that at various times of the year have historically performed favourably. At times, the ETF will seek to profit from short-term strategic opportunities with long or short exposure to broad markets or sector markets. At any time, the ETF may have a significant amount of its portfolio in fixed-income securities, cash or cash equivalents in order to react to market conditions and/or preserve capital. While the ETF may seek to achieve its investment objective and implement these investment strategies by investing primarily in exchange traded products that provide exposure to broad markets, sector markets, and fixed-income securities, the ETF may seek exposure by investing directly or by employing indirect alternatives that are consistent with the ETF's investment objectives. The ETF may be exposed to commodities markets. The ETF may engage in a limited amount of short selling.

### Risk

All investments involve risk. When you invest in the ETF the value of your investment can go down as well as up. For a description of the specific risks of this ETF, see the ETF's prospectus.

### Statement of Rights

Under securities law in some provinces and territories, you have the right to:

- cancel your purchase within 48 hours after you receive confirmation of the purchase, or
- other rights and remedies if this document or prospectus contains a misrepresentation. You must act within the time limit set by the securities law in your province or territory.

For more information, see the securities law of your province or territory or ask a lawyer.

### ETF Expenses

You don't pay these expenses directly. They affect you because they reduce the ETF's returns.

		Annual Rate (as a % of the ETF's value as at December 31, 2015)
Management expense ratio ("MER")	(This is the total of the ETF's management fee and operating expenses.)	2.48%
Trading expense ratio ("TER")	(These are the ETF's trading costs.)	0.25%
Total ETF expenses	(The amount included for Total ETF expenses is the amount arrived at by adding the MER and the TER.)	2.73%

### Performance Fee

The ETF pays to the Manager a performance fee, if any, equal to 20% of the amount by which the performance of the ETF, at any date on which the fee is payable, (i) exceeds a "high water mark" and (ii) is greater than an annualized return of 5%. The performance fee is included in the MER set out above. For a full description of the performance fee of this ETF, see the ETF's prospectus.

### Other Fees

The Manager of the ETF, may, at its discretion, charge dealers redeeming a prescribed number of units of the ETF a redemption charge of up to 0.25% of the redemption proceeds. The Manager will publish the current redemption charge, if any, on its website, [www.horizonsetfs.com](http://www.horizonsetfs.com).

A redemption charge will not be charged to a unitholder selling units of the ETF on the TSX. You may pay brokerage fees to your dealer when you purchase and sell units of the ETF.

Commissions, trailing commissions, management fees and expenses all may be associated with an investment in exchange traded products managed by AlphaPro Management Inc. and Horizons ETFs Management (Canada) Inc. (the "Horizons Exchange Traded Products"). The Horizons Exchange Traded Products are not guaranteed, their values change frequently and past performance may not be repeated. The prospectus contains important detailed information about the Horizons Exchange Traded Products. Please read the prospectus before investing.

The Horizons Exchange Traded Products include the Horizons Index ETFs ("Index ETFs"), Bull Plus and Bear Plus ETFs ("Plus ETFs"), Inverse ETFs ("Inverse ETFs"), VIX ETFs (defined below) and actively managed ETFs. The Plus ETFs and certain other Horizons Exchange Traded Products use leveraged investment techniques that magnify gains and losses and result in greater volatility in value. These Horizons Exchange Traded Products are subject to leverage risk and may be subject to aggressive investment risk and price volatility risk, which, where applicable, are described in their respective prospectuses. Each Plus ETF seeks a return, before fees and expenses, that is either 200% or -200% of the performance of a specified underlying index, commodity or benchmark (the "Target") for a single day. Each Index ETF or Inverse ETF seeks a return that is 100% or - 100%, respectively, of the performance of a Target. Due to the compounding of daily returns, a Plus ETF's or Inverse ETF's returns over periods other than one day will likely differ in amount and possibly direction from the performance of their respective Target(s) for the same period. The Horizons Exchange Traded Products whose Target is the S&P 500 VIX Short-Term Futures Index(tm) (the "VIX ETFs"), one of which is a Plus ETF, one of which is an Inverse ETF, and one of which is an Index ETF, as described in their prospectus, are speculative investment tools that are not conventional investments. The VIX ETFs' Target is highly volatile. As a result, the VIX ETFs are not generally viewed as stand-alone long-term investments. Historically, the VIX ETFs' Target has tended to revert to a historical mean. As a result, the performance of the VIX ETFs' Target is expected to be negative over the longer term and neither the VIX ETFs nor their Target are expected to have positive long term performance. Investors should monitor their holdings, as frequently as daily, to ensure that they remain consistent with their investment strategies.
