Horizons ETFs is a member of Mirae Asset Global Investments. Commissions, trailing commissions, management fees and expenses all may be associated with an investment in exchange traded products managed by Horizons ETFs Management (Canada) Inc. (the "BetaPro Products"). The BetaPro Products are not guaranteed, their values change frequently and past performance may not be repeated. The prospectus contains important detailed information about the BetaPro Products. **Please read the prospectus before investing.**

The BetaPro Products consist of 2x Daily Bull and 2x Daily Bear ETFs ("2x Daily ETFs"), Inverse ETFs ("Inverse ETFs") and VIX ETFs (defined below). Certain BetaPro Products use leveraged investment techniques that can magnify gains and losses and may result in greater volatility of returns. These BetaPro Products are subject to leverage risk and may be subject to aggressive investment risk and price volatility risk, which, where applicable, are described in their respective prospectuses. Each 2x Daily ETF seeks a return, before fees and expenses, that is either 200% or -200% of the performance of a specified underlying index, commodity or benchmark (the "Target") for a single day. Each Index ETF or Inverse ETF seeks a return that is 100% or -100%, respectively, of the performance of a Target. Due to the compounding of daily returns, a 2x Daily ETF's or Inverse ETF's returns over periods other than one day will likely differ in amount and possibly direction from the performance of their respective Target(s) for the same period. The BetaPro Products whose Target is the S&P 500 VIX Short-Term Futures Index™ (the "VIX ETFs"), one of which is a 2x Daily ETF and one of which is an Index ETF, as described in their prospectus, are speculative investment tools that are not conventional investments. The VIX ETFs' Target is highly volatile. As a result, the VIX ETFs are not generally viewed as stand-alone long-term investments. Historically, the VIX ETFs' Target has tended to revert to a historical mean. As a result, the performance of the VIX ETFs' Target is expected to be negative over the longer term and neither the VIX ETFs nor their Target are expected to have positive long term performance. **Investors should monitor their holdings, as frequently as daily, to ensure that they remain consistent with their investment strategies.**
